- Boilers: 3 • Electric (2 Guests + 1 Crew)
- Boiler Capacity: 3 • 50 L
- Fresh Water Maker: Idromar – 180 L/h

- Electrical Voltage: 220 V / 24 V
- Generators: 2 • Kohler, 20 kW
- Batteries: 18 (4 Engine + 2 Generators + 12 Services)
- Battery Chargers: Present
- Inverter: Present

DESCRIPTION OF THE INTERIORS

The interior of the Pershing 80 captures the brand's unmistakable DNA: sporty, contemporary, and performance-driven, enhanced by refined finishes and a layout designed for both fast cruising and relaxed living on board. Large windows and carefully planned lighting create a bright, modern atmosphere while keeping the sleek, "yacht-club" feel Pershing is known for.

A key highlight is the main salon's aft glass door system, which fully opens to seamlessly connect the interior with the cockpit. This creates a true open-space living area, transforming the salon and outdoor lounge into one continuous entertainment zone—ideal for social moments at anchor or during relaxed coastal cruising.

Below deck, the yacht offers four guest cabins served by three bathrooms, delivering a flexible and highly usable configuration for families and guests. The full-beam master cabin provides generous volume, excellent storage, and a refined contemporary ambiance. The VIP cabin is equally comfortable and well finished. The guest area is completed by two additional cabins, including the twin cabin located on the port side (left) with its dedicated bathroom, offering privacy and practicality for guests.

Overall, the Pershing 80 blends Italian design, comfort, and a distinctly sporty character—perfectly aligned with her iconic exterior profile and exhilarating performance pedigree.

EQUIPMENTS

Navigation & Communication

- GPS / Chart Plotter
- Radar
- Autopilot
