## DESCRIZIONE COMPLETA

Alena 56 is an elegant and sharp motoryacht, a Fast Commuter designed by Andrea Carnevale with a deep V hull, traditional construction in fiberglass with a sandwich deck. The Alena 56 makes full use of technology, hydraulics and electricity, with the hydraulically extendable sundeck at the stern, the retractable roof that completely repairs the cockpit, rigid top and side windows above and alongside the driving area that can be opened electrically (practically transforms into an Open). The cockpit maintains a strategic position, while the engine room (which can be accessed from the cockpit) has all the space necessary for good operation. The Alena 56 has a very stable hull, with balanced trim even in the tightest turns. Behind the wheel there is a feeling of great safety also thanks to a really good visibility from the helm station; she specifies the response to the commands.
